Profile

Dynamic and results driven professional with a foundation in tech environments. Experienced as a NOC Engineer and a Full-Stack Developer, bringing a robust combination of cloud infrastructure expertise, software development, and innovative problem-solving abilities. Eager to continuously learn, adapt, and contribute to cutting-edge technologies and scalable systems.

Skills

- Cloud & DevOps: AWS(ECS, EC2, CloudWatch, Lambda), Kubernetes, ArgoCD, Terraform, Docker, Jenkins
- Programming Languages & Frameworks: C#, Python, JavaScript, TypeScript, Java, C++, SQL, Node.js, React, Angular, ASP.NET, Web API, .NET Core, HTML/CSS
- Databases & Tools: MongoDB, Entity Framework, Git, GitHub, Vercel, Coralogix, Grafana, Jira, Checkly, Pingdom
- AI & Hardware: YOLO, RF-DETR computer vision models, OpenCV ,Roboflow ,Drone technology (DJI), Claude code

Experience

NOC Engineer

07/2024 – Present

365scores

Manage, monitor, and troubleshoot system infrastructure and applications to ensure proper functioning of the system. Utilize AWS, Kubernetes, and ArgoCD for deployment, container orchestration, and continuous delivery.

Automation & IaC: Authored and maintained Infrastructure-as-Code (IaC) and automation scripts using Terraform and Python.

Development: Engineered and configured AWS Lambda functions, integrating them directly with a C# ASP.NET architecture to scale backend operations.

Education

B.Sc. Computer Science

12/2023 – 07/2026

Sapir Academic College

Final Project – “Argus”: Developed an autonomous drone based security system integrating a DJI drone with YOLOv11 and OpenCV for real time threat detection and behavioral analysis. Processed live RTMP video streams in a local edge computing environment to identify weapons and suspicious behaviors. Implemented cloud based event logging with MongoDB Atlas and developed a real time Streamlit dashboard for alert monitoring and incident management.

Courses: Embedded computer systems, Object oriented programming in the .NET environment, AI and LLM.

Software Developer

Sela College 2022-2023. *TechIDF. Soldiers to High-Tech program.*

Software development (web) 12-month track plus on job training, honors program of the college.

Programming languages: C#, JavaScript, TypeScript, Html, CSS, SQL , Python.

Technologies: ASP.Net, Web API, .NET Core, Azure, Node Js, Angular, React.

High school diploma

2014-2019: Makif Z High School – Full matriculation certificate, AP in Mathematics, English, Physics and Biology

Military Service

2019-2023: Combat Soldier – Search and Rescue.

Military training (Rifleman 06 and Rescuer 07) and assumed afterwards operational lines in Judea and Samaria.

Discharge Rank: Staff Sergeant.

Languages

Hebrew: (Native Speaker) | **English:** (Fluent)
